

PROVEN POWER MEETS FLEXIBILITY WITH BOSCALID TANK MIX SOLUTIONS

Quali-Pro Boscalid

delivers reliable dollar spot control from this trusted, industry-standard chemistry. When paired with Strobe 2L or Chlorothalonil 720 SFT, it offers active ingredient load customization and measurable cost savings over pre-packaged competitors.

BOSCALID: THE DOLLAR SPOT SPECIALIST

QUALI-PRO BOSCALID sets the standard for dependable, long-lasting dollar spot protection. As a Group 7 SDHI fungicide, Boscalid delivers up to 28 days of residual control, helping turf managers reduce the number of applications needed while maintaining exceptional disease suppression. Its proven performance against dollar spot strains resistant to other fungicide groups gives turf professionals confidence and peace of mind that their course is protected.

STRATEGIC TANK MIXES WITH BOSCALID

Combining Boscalid with **STROBE 2L** (azoxystrobin, FRAC 11) creates a powerful, dual-mode fungicide program that enhances spectrum and extends residual control. Together, the SDHI and QoI chemistries protect against a wide range of foliar and soilborne turf diseases while improving resistance management.

Target Diseases: Dollar spot, Anthracnose, Brown Patch, Gray Leaf Spot, Leaf Spots, Pythium Blight, Summer Patch, and Take-All Patch

Partnering Boscalid with **CHLOROTHALONIL 720 SFT** adds the proven multi-site protection of FRAC M5 chemistry for a robust layer of defense against tough foliar diseases. This contact activity complements Boscalid's systemic movement, resulting in enhanced coverage, resistance-breaking performance, and longer-lasting protection under high disease pressure with flexibility in rates and timing.

Target Diseases: Dollar Spot, Anthracnose, Brown Patch, and Leaf Spots

ENGINEERED FOR PERFORMANCE & SAVINGS

Combining Quali-Pro Boscalid with other Quali-Pro products delivers measurable cost savings compared to pre-mixed combination products on the market. Customers can count on the efficacy and safety backed by our industry-leading research and development team, along with the quality and dependable support you expect from the leading domestic manufacturer of turf protection products.
