PROTECTION

FUSE®

TERMITICIDE/INSECTICIDE

Fuse® is a proprietary Combination Chemistry® product containing two of the most trusted active ingredients in the industry. Fuse offers multiple modes of action to fight resistance and provide a powerful tool for termite and perimeter pest control applications.

Advantages of using FUSE

- Apply up to eight (8)* perimeter applications per year
- 8 year Promises of Protection warranty
- Long lasting residual
- Non-repellent formulation
- Low odor
- Preventative & curative application

*Number of applications depend on use rate and spray swath. Please refer to the complete label for more information and restrictions.

How it Works

Both active ingredients work by disrupting the normal function of the central nervous system in insects.

Use sites

In and along the outside perimeter of structures and building construction

Insects Controlled

Ants, boxelder bugs, european earwigs, millipedes, pill bugs, silverfish, termites

Active Ingredients

- 6.6% Fipronil
- 21.4% Imidacloprid

Packaging

- 4 x 32 oz/case (112 cs/pallet)
- 2 x 128 oz/case (96 cs/pallet)
