

INSECTICIDE

TEKKO® TRIO FOAM

Tekko Trio Foam is a 3-way IGR with two distinct modes of action in a dry foam formulation.

Advantages of using TEKKO TRIO FOAM

- Contains three insect growth regulators
- Breaks the insect life cycle
- Inhibits re-infestation of cockroaches for up to 6 months
- Long lasting formulation
- Helps manage housefly populations

How it Works

- Tekko Trio Foam's three active ingredients work together to disrupt the life cycle of insects.
- Hydroprene and Pyriproxyfen are Juvenile Hormone mimics. They prevent normal adulthood development & causes sterilization.
- Hydroprene is moderately volatile and will translocate, penetrating voids cracks and crevices around a treated area.
- Novaluron is a Chitin Synthesis Inhibitor. It prevents the formation of a new exoskeleton.
- Tekko Trio Foam is an expanding foam with a 30:1 expansion ratio to foam into cracks, crevices, structural voids, and other labeled areas. One can produces approximately 3.5 gallons of foam.
